

## **GEOLOGY**

**GLY 1111** - Physical Geology Laboratory - Laboratory course which may accompany GLY 1113. Study of the common rocks, minerals, topographic maps, and geological maps. 1 semester hour credit.

**GLY 1113** - Physical Geology - The course is designed to help students to more thoroughly understand the physical environment and the forces that shape our Earth and affect our lives. It primarily covers the relationships of Earth processes and the resultant rocks, minerals, physical features, and natural resources on the Earth's surface and in its subsurface. Three semester hours credit.
