Jones is the Place for You to Begin Your Geography Education

Advanced Educational Opportunities

USM

Certificate in Geographic Information Technology
B.S. Geographic Information Technology
B.S., B.A., M.S., & Ph.D. Geography

MSU

Geospatial and Remote Sensing Technology
Certificate
B.S. Geographic Information Systems
B.S. & M.S. Geosciences
Ph.D. in Earth & Atmospheric Sciences

Jobs in Geography are Growing

The last 20 years have shown an ever increasing demand for individuals with advanced education in Geography. Today there are more geographers than ever before employed in stimulating jobs.

Cutting Edge Geographic Technologies

Today's Geographers utilize satellite images, Global Positioning Systems (GPS), Geographic Information Systems (GIS), and Remotely Sensed Data, both in the field and in their offices and laboratories. These advancements have revolutionized both our ability to analyze and evaluate data, as well as our ability to communicate and share information on a truly global basis.

With a Degree in Geography, almost anything is within your grasp.

A typical Bachelor's Degree in Geography qualifies the average person for over 250 Government and Civil Service jobs. Many geographers are employed by various levels of government, working with a city or county at the local level all the way to working for a large federal agency and everything in between.

Businesses and industries have found geographers to be priceless.

This sector has seen phenomenal growth in the number of geographers employed. Geographers and new geographic technologies have provided answers to complex real world problems for everything from marketing companies to forestry. Geographers are utilized in international business and trade. Utility and telecommunication companies utilize geography to help manage their resources. Environmental science and management companies utilize geography to help analyze environmental risks with preservation.

Educational Institutions also have strong needs for Geography Teachers.

Throughout the last few years, most states have revised curriculum and enacted higher standards for geography education
